

Boral Clay Pavers

Summerset Pavescape Bringelly

creating **better** living

Boral clay pavers are the naturally enduring option for surfacing outdoor spaces.

Choose from three ranges of colours and textures and know that you've made the right decision.

Pavescape® Coffee in 45° Herringbone pattern.

Bringelly® Terracotta in 45° Herringbone pattern.

Summerset® Opal in 45° Herringbone pattern.

natural character

Boral clay pavers are made from blends of natural clays and shales, giving them an inherent beauty that only nature can deliver.

hard wearing

Resilient and durable, Boral clay pavers will sustain their integrity over the years and age more gracefully than many other paving alternatives.

won't fade

Boral clay pavers will not fade, and sealing is not necessary to maintain their colour and beauty. The natural kiln-fired process creates colours that will last a lifetime.

low maintenance

Less maintenance than lawn and no need to seal and re-colour ever. If access to water pipes is required, often the same pavers can be re-laid, making colour matching simple.

low cost

Since Boral clay pavers are easy to install and have little maintenance requirements, the overall cost is low compared to many other alternatives.

slip resistant

All Boral clay pavers have a high level of slip resistance, making them ideal for use in wet areas, on steps or steep and sloping pathways and driveways.

design

Get creative with a variety of Boral clay paver colours, textures and laying patterns. Use accent colours to create borders and design features and create appealing zones for your home.

Onyx

Enhance the character of your home's outdoor area with timeless colour

Summerset pavers stay true to their form in all conditions, making them ideal for pathways and high traffic areas.

The soft, natural colours will impart an immediate charm to enhance your surrounding.

When planning your paved area, think about your choice of laying patterns. Be bold with contrasting colours! A large span of paved area doesn't have to be boring – the possibilities are endless!

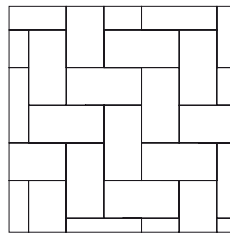

Think outside the square! Unlike square pavers, Boral rectangular clay pavers can be laid in many patterns and combinations (see below). 45° Herringbone is the strongest laying pattern, best for driveways. If strength is not so critical, graceful curves and geometric patterns can be easily created with Boral clay pavers.

See your retailer for colours available in your region. Not all colours are available in every region for each product. Please ask to see a sample of your colour / texture choice before ordering. Variation in colour, texture and size is a natural characteristic of clay products. Displays, examples and brochures are intended as an indication only. Customers should ensure that current batches are acceptable before installation and that on site blending, laying and cleaning is carried out in accordance with our instructions.
